Ecocriticism is an umbrella term under which a variety of approaches fall: this can make it a difficult term to define.As ecocritic Lawrence Buell says, ecocriticism is an ‘increasingly heterogeneous movement’ (1). But, ‘simply put, ecocriticism is the study of the relationship between literature and the physical environment’ (Glotfelty xviii).

But, additionally, critical disability theory actively seeks alliances and has produced work in conversation with other key areas of critical thought: critical race theory, postcolonial theory, queer theory, and Continental philosophy, among other strategies. It also reflexively considers the exclusions, framing, and normative presuppositions of disability studies, favoring intersectional ...

Writing - More implications for mainstream teachers: Krashen (1984) applies his theory of the affective filter to the acquisition of writing competence. Learners who are anxious or have low expectations of success are less likely to become proficient writers, regardless of the amount and quality of the reading they do.

Scientific racism, sometimes termed biological racism, is the pseudoscientific belief that empirical evidence exists to support or justify racism (racial discrimination), racial inferiority, or racial superiority. Historically, scientific racism received credence throughout the scientific community, but it is no longer considered scientific.
